

Iron Woods® - FSC® Certified Cumaru Decking and Cladding

Cumaru

Time Tested ...Time tested in the real world as well as the laboratory, Iron Woods® brand FSC® Certified Cumaru products have a proven natural resistance to anything that 'Nature' or 'Man' can throw at it, including but not limited to wear, sea salt, rot, and fire without the use of chemicals or coatings. Combined with lower surface heat retention, and compliance with ADA requirements for slip resistance, Iron Woods® brand FSC® Certified Cumaru is a natural choice for any deck, siding or rain screen project.

Easy to Care For – Hard to Resist... Iron Woods® brand FSC® Certified Cumaru decking can be left to weather naturally to an attractive silver grey requiring only the occasional cleaning. Or you can choose the option of maintaining the woods natural rich color by cleaning and refinishing as required, not unlike polishing your favorite piece of furniture. And unlike composite decking, Iron Woods® can always be restored to their original appearance because the woods natural beauty runs through and through.

The Difference is in the Grade – We Set the Standards... Cumaru, like any other species of wood, is produced to different grade and quality standards. In the absence of official grading rules for hardwood decking, Timber Holdings set its own standards over 40 years ago. Much like Kleenex® or Escalator®; consumers, architects and building professionals recognize the Iron Woods® 'Premium Select Architectural Grade' represents the benchmark for quality and consistency in what has become commonly known as the Iron Woods decking category.

The Brand that Launched an Industry – Iron Woods® Stands Apart... Iron Woods® Cumaru is one of the strongest and hardest timber species known to exist. Iron Woods FSC Certified Cumaru decking is stocked in Net 21mmx140mm (13/16" thick x 5.5" wide) random length decking. Cladding profiles available include Tongue and Groove (square and beveled edge), Ship Lap, Vanish Rain Screen.

IRON WOODS

Green By Nature – Build with Conscience™- Iron Woods® brand products have an environmental reputation you can build on...

Our purchasing decisions are a reflection of our values and define our very nature. We invite you to learn more about the standards that set Timber Holdings USA and our Iron Woods® brand products apart from the competition.

There is a reason why the National Audubon Society has repeatedly chosen Iron Woods for use in its boardwalks. Timber Holdings established our Green By Nature...Build with Conscience Environmental Compliance Program. Green By Nature promotes the environmental benefits associated with the use of naturally durable wood products. By setting compliance standards which address 'Life Cycle Environmental Impact' of a material from cradle to cradle, domestic and international laws, regulations and third party certification programs pertaining to the legal harvest and trade of timber products.

"I was so impressed with the quality of our Iron Woods Cumaru. 7000 running feet worth of total boardwalk (decking, rails, piles, joists, and headers) and no sign of a knot anywhere! The folks at Iron Woods were extremely knowledgeable about the entire spectrum of tropical hardwoods and guided us to the right choice for our specific needs."

Michael Dawson
Biedler Forest Center Director

"We just opened our boardwalk in Sept. at our Hummingbird Migration Celebration and Nature Festival. The new boardwalks were a crowd favorite. The Iron Woods decking you supplied for our boardwalk looks fantastic. I also appreciated your help in documenting the experience and environmental stewardship of Timber Holdings which helped our selection process for a vendor. I would not hesitate to recommend Timber Holdings to others."

Walter Hubbard
Strawberry Plains Audubon Center

"This particular company has done everything it can and is doing the right thing from an environmental point of view."

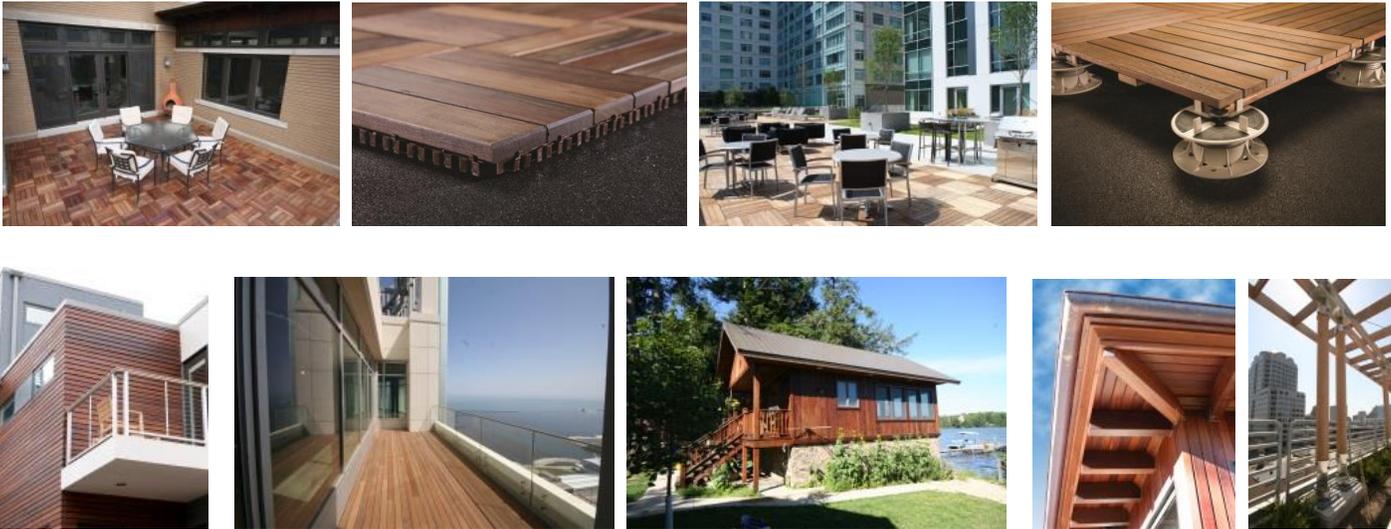

Dr. Patrick Moore
Greenpeace Cofounder and Green Spirit Strategies Founder

FSC® - Forest Stewardship Council – Environmental Leadership...

Timber Holdings was the 48th company approved for FSC Chain of Custody certification under the Rain Forest Alliance SmartWood program. Iron Woods FSC® Certified Cumaru products meet USGBC/LEED (U.S. Green Building Council /Leadership in Environmental Design) credit requirements.

Product Solutions - Choosing the right product for the application... Budget, Climate, Aesthetics and Site Conditions all impact product and profile selections. For example, if there is poor ventilation under your deck, 5/4x4 decking will perform better than 5/4x6 decking. If you are in an extremely dry climate, kiln dried decking will perform better than air dried decking. If you don't want to see fasteners Iron Woods unique **Vanish Decking™** profile provides an exterior hardwood floor appearance. If you are building a roof deck, **Iron Woods Elevations™ Deck Tile and Pedestal System** can be utilized. If you want to build a deck at grade or cover an old ugly deck check out our **Iron Woods® Click Together Deck Tiles**. If you are looking for a state of the art exterior wall cladding system **Iron Woods® Vanish Rain Screen™ System** is the solution. Iron Woods® FSC Certified Cumaru is available special order in a variety of products and profiles for handrail, siding, paneling, porch flooring, and architectural trim in dimensions up to 6"x8" and lengths to 20'. **Custom Milling** services are also available by special order. We highly recommend reviewing our "**Iron Woods® Best Practices**" guide as part of your product selection process.
