

TAKE OFF FORM - Please email to info@ironwoods.com

The following information is required to accurately quote the Elevations Roof Deck System using pedestal calculation software. All measurements should be indicated in inches (not feet and inches). Fractions are not allowed. Layout drawings will be provided upon order placement if required. Pedestals are considered a Special Order Product and Returns or exchanges will not be accepted.

1) Select Deck Type

- A) Iron woods Elevations Deck Tiles (1.5 Thickness) on Pedestals
 - 1) 1-7/8" minimum (roof to top of deck) starting elevation required. Yes/No
 - 2) Deck Tile Type (Select One): 2'x2' / 2'x4' / 2'x6'
- B) Conventional 5/4 x4 Iron Woods Ipe Deck (1" Net Thickness plus stringer) on Pedestals
 - 1) 2-3/8" minimum (roof to top of deck) starting elevation required: Yes/No
 - 2) Stringer Option (Select One): 2x4 PT Pine or Ipe (1.5" Net Thickness) or 5/4x4 Ipe (1" Net Thickness)

2) Supply Drawing or Sketch containing the following information in pdf format.

- A) Decking Live Load Requirement: _____ psi.
- B) Perimeter of the area to be covered with measurements for all sides (Highlighted) _____ LF.
Elevation heights (roof to top of deck) at points along the perimeter area to be covered (Noted).
- C) Areas not to be covered/excluded (Not Paved): XXXX these areas.
- D) Areas that will require additional pedestal support like hot tubs or planters: OOOO these areas.
Elevation heights (roof to top of deck) at points along the perimeter area requiring additional supports.
- E) Location and elevation heights (roof to top of deck) at drainage points: Labeled on Drawing.
- F) Smallest starting pedestal height: _____ Inches.
- G) Slope of area being paved: (ex. 1/4" per foot): _____/FT.
- H) Slope lines indicating flow of water or from High to Low elevation points of the areas to be covered.
- I) Indicate type and height of perimeter parapet walls: _____.
- J) Starting point where pavers will be laid as a full tile: Labeled on Drawing.
- K) Paver Layout Dimension and Pattern desired.

Disclaimer: Take offs are based on drawings and take off form supplied by others. Quantity and sizes quoted are subject to change if any jobsite conditions or specifications change at time of installation. Extra supports required for any heavy items placed on pavers and are not included in quotes – ie: planters, hot tubs, etc. Take off and Layout Drawings are for estimating only and are not a construction document. It is the responsibility of the designer to determine suitability of the system based upon roof design and construction. If all information is not provided a takeoff cannot be calculated or may result in an inaccurate calculation.
